ironing

BiMax

The professional ironing system with a pressure boiler and continuous refilling.

Quality and performance. The Bi-Max ironing system combines top quality and practicality of use offering highly professional performance, low power consumption and a long life.

The chromium-plated steel and painted steel base complete with cutting-edge components are the result of modern technology. The professional iron is very easy to manoeuvre: it gently glides on fabric and, because of its tapered tip, it even irons hard to reach areas perfectly.

Continuous refilling:

Bi-Max lets you iron for a long time, uninterrupted – with the automatic electronic filling system, the auxiliary tank can be filled at any time while ironing.

Direct refilling of the boiler:

The Bi-Max boiler can also be filled directly. Thanks to its screw cap, the boiler can be washed easily and is an excellent alternative for anything unexpected.

Vertical ironing:

The Bi-Max iron can generate steam in a vertical position, enabling fabrics to easily be steamed, freshened up or ironed when hung up.

TECHNICAL DATA

Refilling system: **AUTOMATIC + MANUAL**

Boiler water capacity: **0.6 L**

Tank refill capacity: **0.8 L**

Boiler power: **1100 WATT**

- **Stainless steel boiler with removable resistance**
- **Safety heat limiter**
- **Upper body made from chromium-plated steel**
- **Lower body made from painted steel**

Iron power: **800 WATT**

Maximum power: **1900 WATT**

Voltage: **230 V 50-60 HZ**
