Easymax

the
professional
ironing board

PROFESSIONAL IRONING IN YOUR HOME

FOR HIGH TEMPERATURES

SUCTION

BLOWING

The EasyMax ironing board with a heated suction and blowing surface is a board for domestic work with professional performance. EasyMax stops rising steam and odours when ironing, the formation of condensation and consequent dripping underneath the board; laundry is well ironed and dry on both sides. Your work becomes accurate and fast: with the suction, fabrics remain attached to the work surface to prevent creases, while blowing lifts the most delicate ones, which can be ironed without pressing them, all without pedals, with convenient automatic control.

Robust:

Made entirely from steel, EasyMax guarantees particular sturdiness, perfect stability and durability. The legs and other supporting parts are chromium-plated, the structure and accessory components are oven-painted or stainless steel, while the wide work surface, covered with a high-quality cover and textile lining, is made using a special steel 3D frame.

Practical:

Due to weight balancing and the convenient transport kit, it opens and closes simply without ever bending over. After use it can be placed in a vertical position without the need for support points: once closed it remains standing alone.
