

## Elektra

**Five  
appliances  
in one**

Elektra  
vacuums,  
washes,  
dries,  
sanitises  
and irons.

### Some important features

- > Intuitive control panel with digital display
- > Dual-turbine motor
- > Excellent holding capacity of up to almost 6 litres
- > Biggest water filter in its class
- > Molecular separator
- > 4,5 bar steam with unlimited autonomy
- > Energy saving boiler
- > Powerful suction of solids and liquids
- > Cleans the air
- > Steam cleaning
- > Instant drying
- > Professional ironing
- > Automatic refilling
- > Made in Italy

### TECHNICAL DATA

Suction: **2400 MM**  
 Motor power: **1200 WATT**  
 Dimensions: **37 x 30 x 40 CM**  
 Steam pressure: **4,5 BAR**

Boiler power: **1900 WATT**  
 Boiler volume: **0,8 L**  
 Refilling system: **AUTOMATIC**  
 Steam ready: **3 MIN**

Water tank for steam: **1,5 L**  
 Water filter capacity: **5,5 L**

The entire range is exclusively made in Italy, in full respect of EC directives, with Italian components, to ensure maximum reliability, efficiency and durability.

**Genuine Made in Italy.**

# Elektra

small  
on the  
outside,  
professional  
on the inside

**MAXIMA**  
MADE IN ITALY

**Elektra is the result of careful research undertaken by people passionate about cleaning and innovation, and represents the last frontier of the latest-generation multifunction devices.**

It performs the functions of 5 appliances: it vacuums, washes, dries, sanitises and irons. It is a special, powerful and ecological machine, it doesn't need any filters or bags that have to be changed every so often, it uses the natural properties of water to ensure maximum hygiene and cleaning. As it is small, it can be manoeuvred easily and can be kept anywhere, Elektra is the solution you are looking for.

### AIR CLEANING CYCLE

#### 1\_Suction

Unhealthy air and dust are sucked up and conveyed inside the machine.

#### 2\_First filtering

Unhealthy air is subjected to a first filtering using water.

#### 3\_Filtering with separator

A second filtering operation is then carried out by the exclusive "molecular separator" that manages to intercept and reject even the smallest particles.

#### 4\_Output of clean air

These two natural filters expel healthy, clean and perfumed air.

### AUTOMATIC SYSTEM

#### Automatic refilling

A high-pressure pump injects water directly into the boiler while always keeping the level constant when using steam. You can refill the tank even when the machine is switched on without losing time.

Steam lance adapter

Extensions

Tank filling bottle

Handle with hose

150-mm opening

Multifunction brush

Wiper

### on request

Extendable hose

Electric carpet cleaner

Iron

Steaming turbobrush

Transparent nozzle

Turbo carpet cleaner

Acqua Clean

Natural essential oils

Vaporiser

outside,  
professional  
on the  
inside.

### STEAM GENERATION

The boiler is one of the main components of the machine, steam is created inside it. Limescale is the boiler's main enemy, Maxima uses technology designed to help reduce the risk of clogging and malfunction.

#### 1. Limescale removal injector for automatic refilling

#### 2. Stainless Steel

#### 3. Resistance
