**MAXIMA**  
 MADE IN ITALY

For efficient, capable, safe and convenient domestic cleaning. It is a small machine with a great performance: **it vacuums, washes, dries, sanitises and irons.**

A special, powerful, ecological and space-saving machine, designed and made for today's needs.

### AIR CLEANING CYCLE

#### 1\_Suction

Unhealthy air and dust are sucked up and conveyed inside the machine.

#### 2\_First filtering

Unhealthy air is subjected to a first filtering using water.

#### 3\_Filtering with separator

A second filtering operation is then carried out by the exclusive "molecular separator" that manages to intercept and reject even the smallest particles.

#### 4\_Output of clean air

These two natural filters expel healthy, clean and perfumed air.

### AUTOMATIC SYSTEM

#### Automatic refilling

A high-pressure pump injects water directly into the boiler while always keeping the level constant when using steam. You can refill the tank even when the machine is switched on without losing time.

### STEAM GENERATION

The boiler is one of the main components of the machine, steam is created inside it. Limescale is the boiler's main enemy, Maxima uses technology designed to help reduce the risk of clogging and malfunction.

#### 1. Limescale removal injector for automatic refilling

#### 2. Stainless Steel

#### 3. Resistance
