

WATER FILTER

SEPARATOR

CE MARKING

MADE IN ITALY

## HeraPlus

### Some important features

- > Shockproof and high-resistance plastics
- > Built-in rubber cord winder
- > Intuitive cooled ergonomic handle
- > Control panel with digital display
- > Controls and settings also on the handle
- > Dual-turbine motor
- > Excellent holding capacity of up to almost 6 litres
- > Biggest water filter in its class
- > Molecular separator
- > 6-bar steam with unlimited autonomy
- > Energy saving boiler

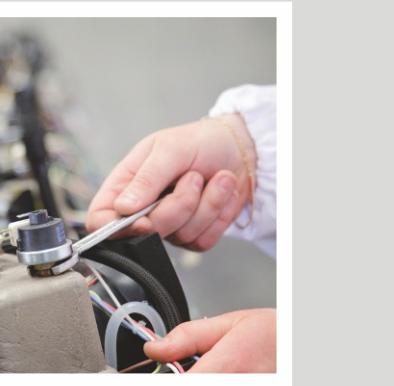

**Even richer and more versatile**  
Powerful suction of solids  
and liquids  
Air cleaning  
Steam cleaning  
Washing with power jet  
enriched steam  
Delicate cold washing  
Instant drying  
Professional ironing  
Functional and compact design  
Automatic refilling  
Made in Italy

### TECHNICAL DATA

Suction: **2400 MM**  
Motor power: **1200 WATT**  
Dimensions: **37 X 30 X 41 CM**  
Steam pressure: **6 BAR**  
Boiler power: **1900 WATT**

Boiler volume: **1,3 L**  
Refilling system: **AUTOMATIC**  
Steam ready: **5 MIN**  
Water tank for steam: **1 L**  
Detergent tank: **0,5 L**

Water filter capacity: **5,5 L**  
Power jet enriched steam: **YES**  
Cold washing: **YES**

The entire range is exclusively made in Italy, in full respect of EC directives, with Italian components, to ensure maximum reliability, efficiency and durability.

**Genuine Made in Italy.**

# HeraPlus

the  
hygiene  
for all  
surfaces

**MAXIMA**  
MADE IN ITALY

# HeraPlus

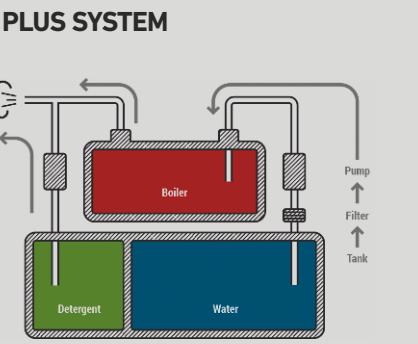

the  
hygiene  
for all  
surfaces

**A new cleaning machine whose multiple functions ensure excellent hygiene for all surfaces.**  
**The use of water as a main element makes it a really safe and ecological machine.**

Its impressive power means it can be used both for domestic and professional use. Equipped with multiple functions: suction, 6-bar steam, power jet and cold washing, it offers so many opportunities to even the most demanding user. If necessary, Hera Plus turns into a powerful steam iron with unlimited autonomy. As it is small, it can be manoeuvred and transported easily and can be kept anywhere. New compact and functional design. Designed and built entirely in Italy.

## 1\_Suction

Unhealthy air and dust are sucked up and conveyed inside the machine.

## 2\_First filtering

Unhealthy air is subjected to a first filtering using water.

## 3\_Output of clean air

A second filtering operation is then carried out by the exclusive "molecular separator" that manages to intercept and reject even the smallest particles.

## 4\_Output of clean air

These two natural filters expel healthy, clean and perfumed air.

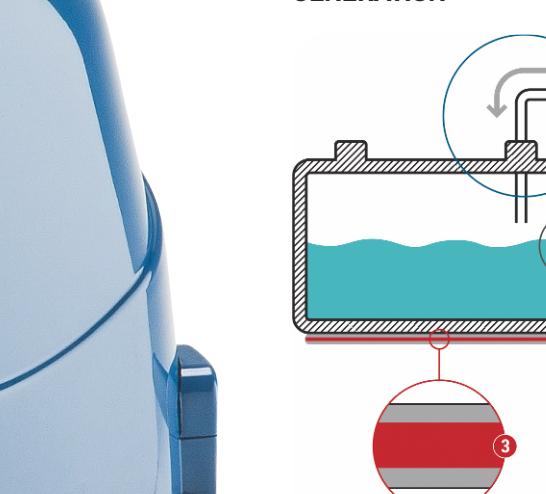

## Power jet/Enriched steam

This feature increases the efficiency of steam and dirt removal. A special pressure pump injects liquid at the same time as steam is released. You can use ordinary water or, if necessary, a special diluted detergent.

## Automatic refilling

A high-pressure pump injects water directly into the boiler while always keeping the level constant when using steam. You can refill the tank even when the machine is switched on without losing time.

## STEAM GENERATION

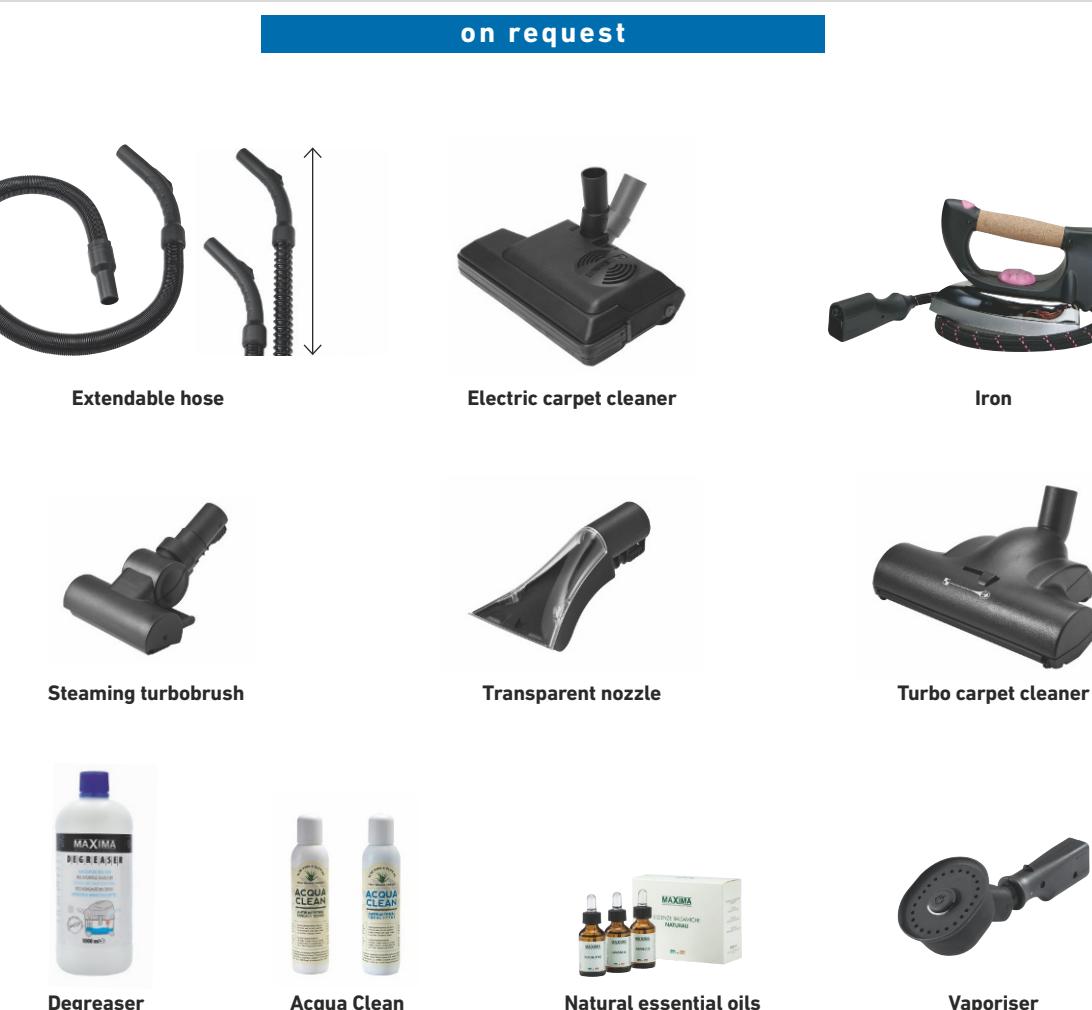

The boiler is one of the main components of the machine, steam is created inside it. Limescale is the boiler's main enemy, Maxima uses technology designed to help reduce the risk of clogging and malfunction.

**1. Limescale removal injector for automatic refilling**

**2. Stainless Steel**

**3. Resistance**
