

HeraPlus

Steam-vacuum
cleaning

MAXIMA
ADVANCED SOLUTIONS

HeraPlus

A new cleaning machine whose multiple functions ensure excellent hygiene for all surfaces.

The use of water as a main element makes it a really safe and ecological machine.

Its impressive power means it can be used both for domestic and professional use. Equipped with multiple functions: suction, 6-bar steam, power jet and cold washing, it offers so many opportunities to even the most demanding user. If necessary, Hera Plus turns into a powerful steam iron with unlimited autonomy.

As it is small, it can be manoeuvred and transported easily and can be kept anywhere.

New compact and functional design.

Designed and built entirely in Italy.

the hygiene
for all
surfaces

HeraPlus

Its power features and compact dimensions make it an indispensable partner for all cleaning needs. Thanks to its small dimensions, it can be handled and moved easily and it can be kept anywhere.

Hera Plus is the solution you were looking for.

- Powerful suction of solids and liquids
- Air cleaning
- Steam cleaning
- Washing with Power Jet enriched steam
- Delicate cold washing
- Instant drying
- Professional ironing
- Functional and compact design
- Automatic refilling
- Made in Italy

Even richer
and more
versatile

The **boiler** refills automatically

HeraPlus
MADE IN ITALY

Hera's 165°C steam guarantees deep hygiene thanks to its efficient boiler.

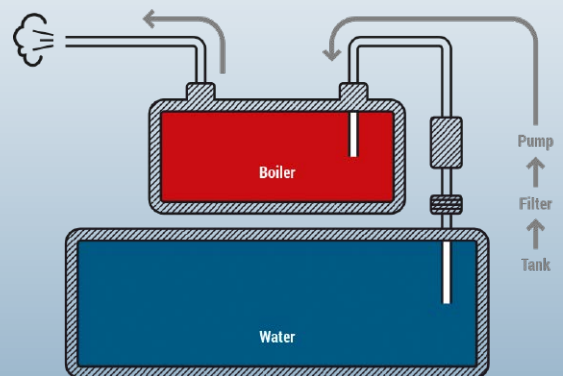

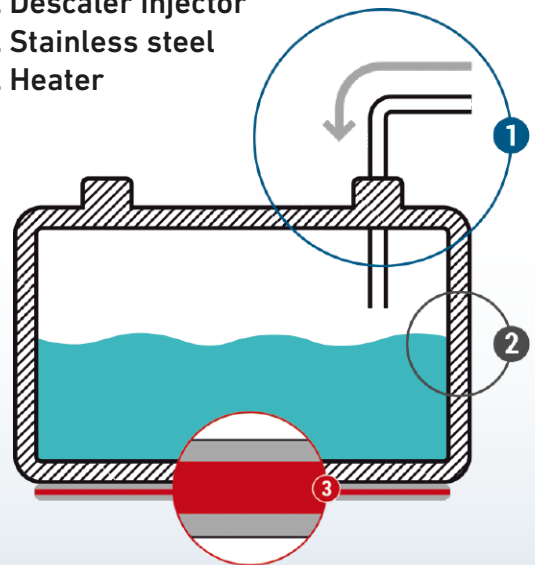

The boiler is one of the main components of the machine, steam is created inside it. Limescale is the boiler's main enemy, Maxima uses technology designed to help reduce the risk of clogging and malfunction.

Automatic refilling

A high-pressure pump injects water directly into the boiler while always keeping the level constant when using steam. You can refill the tank even when the machine is switched on without losing time.

STEAM GENERATION

1. Descaler injector
2. Stainless steel
3. Heater

Hera's 165°C steam is a guarantee of deep hygiene

Power Jet

enriched steam

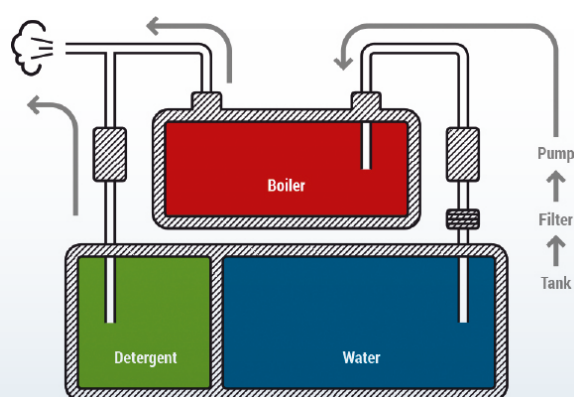

HeraPlus
MADE IN ITALY

Dry steam of Hera Plus combined with the Power Jet function cleans even the most difficult surfaces.

This function allows increasing the steam power and the dirt removal. A special pressure pump injects water or detergent together with steam.

Some non-foaming detergent specific for high temperature can be used.

PLUS SYSTEM

Power Jet creates a high temperature mixture of steam and detergent useful for treating difficult to clean surfaces.

Power Jet speeds up dirt removal

Air cleaning

HeraPlus
MADE IN ITALY

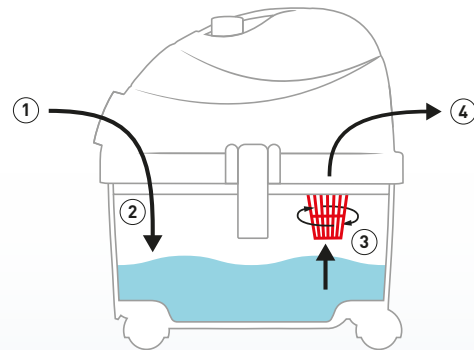

Hera Plus's special motor performs two functions: deeply sucking the dirt and filtering the outgoing air.

The exclusive molecular separator mechanically intercepts the smallest dirt particles and guarantees constant air filtration. Thanks to it, the engine will not suffer the loss of suction due to dirty filters that need to be replaced.

The aspiration of Hera Plus is always at maximum efficiency.

Sucking up dirt is not enough, it must definitely be trapped

AIR CLEANING CYCLE

- 1 Suction**
Unhealthy air and dust are sucked up and conveyed inside the machine.
- 2 First filtering**
Unhealthy air is subjected to a first filtering using water.
- 3 Output of clean air**
A second filtering operation is then carried out by the exclusive "molecular separator" that manages to intercept and reject even the smallest particles.
- 4 Output of clean air**
These two natural filters expel healthy, clean and perfumed air.

optional accessories

standard accessories

HeraPlus
MADE IN ITALY

Steam lance adapter

Extensions

Tank filling bottle

Multifunction brush

Handle with hose

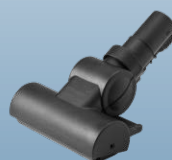

150-mm opening

Wiper

Kit sanitation maxi

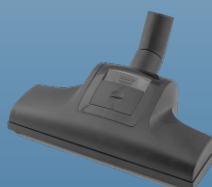

Vaporizing turbo brush

Technical data

Suction: **2400 MM**

Motor power: **1200 WATT**

Dimensions: **37 X 30 X 41 CM**

Steam pressure: **6 BAR**

Boiler power: **1900 WATT**

Boiler volume: **1,3 L**

Refilling system: **AUTOMATIC**

Steam ready: **5 MIN**

Water tank for steam: **1 L**

Detergent tank: **0,5 L**

Water filter capacity: **5,5 L**

Power jet enriched steam: **YES**

Cold washing: **YES**

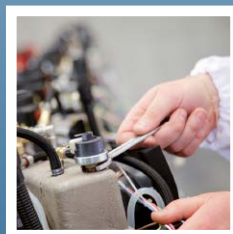

Some important features

- > Shockproof and high-resistance plastics
- > Built-in rubber cord winder
- > Intuitive cooled ergonomic handle
- > Control panel with digital display
- > Controls and settings also on the handle
- > Dual-turbine motor
- > Excellent holding capacity of up to almost 6 litres
- > Biggest water filter in its class
- > Molecular separator
- > 6-bar steam with unlimited autonomy
- > Energy saving boiler
