

HeraAutomatic

**Even richer
and more versatile**

Powerful suction of solids
and liquids
Air cleaning
Steam cleaning
Instant drying
Professional ironing

Some important features

- > Shockproof and high-resistance plastics
- > Built-in rubber cord winder
- > Intuitive cooled ergonomic handle
- > Control panel with digital display
- > Controls and settings also on the handle
- > Dual-turbine motor
- > Excellent holding capacity of up to almost 6 litres
- > Biggest water filter in its class
- > Molecular separator
- > 6-bar steam with unlimited autonomy
- > Energy saving boiler

TECHNICAL DATA

Suction: **2400 MM**
 Motor power: **1200 WATT**
 Dimensions: **37 X 30 X 41 CM**
 Steam pressure: **6 BAR**

Boiler power: **1900 WATT**
 Boiler volume: **1,3 L**
 Refilling system: **AUTOMATIC**
 Steam ready: **5 MIN**

Water tank for steam: **1,5 L**
 Water filter capacity: **5,5 L**

The entire range is exclusively made in Italy, in full respect of EC directives, with Italian components, to ensure maximum reliability, efficiency and durability.

Genuine Made in Italy.

HeraAutomatic

ecological
cleaning
for all
surfaces

MAXIMA
MADE IN ITALY

A new machine for fully ecological cleaning that ensures optimum hygiene on all surfaces. The use of water as the main element makes it a really safe and ecological machine.

Thanks to its power, it is recommended for both domestic and professional use. With the 6-bar steam jet and powerful suction it offers unrivalled ecological hygiene. If necessary, Hera Automatic turns into a powerful steam iron with unlimited autonomy.

Thanks to its small dimensions it is easy to move and handle and it can be stored anywhere. New compact and functional design. Designed and built entirely in Italy.

AIR CLEANING CYCLE

1_Suction

Unhealthy air and dust are sucked up and conveyed inside the machine.

2_First filtering

Unhealthy air is subjected to a first filtering using water.

3_Filtering with separator

A second filtering operation is then carried out by the exclusive "molecular separator" that manages to intercept and reject even the smallest particles.

4_Output of clean air

These two natural filters expel healthy, clean and perfumed air.

AUTOMATIC SYSTEM

Automatic refilling

A high-pressure pump injects water directly into the boiler while always keeping the level constant when using steam. You can refill the tank even when the machine is switched on without losing time.

supplied

Steam lance adapter

Extensions

Tank filling bottle

Multifunction brush

Handle with hose

Wiper

150-mm opening

on request

Extendable hose

Electric carpet cleaner

Iron

Steaming turbobrush

Transparent nozzle

Turbo carpet cleaner

Acqua Clean

Natural essential oils

Vaporiser

ecological cleaning for all surfaces

STEAM GENERATION

The boiler is one of the main components of the machine, steam is created inside it. Limescale is the boiler's main enemy, Maxima uses technology designed to help reduce the risk of clogging and malfunction.

1. Limescale removal injector for automatic refilling

2. Stainless Steel

3. Resistance
