

Athena 8 Plus

Professional
steam-vacuum
cleaning

MAXIMA
ADVANCED SOLUTIONS

Athena 8 Plus

Athena is the first steam vacuum cleaner this compact with a steam jet that can reach **8 bar** of pressure.

It is equipped with a powerfull suction motor to clean and dry in one step.

It is a special, powerful and ecological machine; it sucks up solids and liquids and does not need any filters or bags that have to be changed every so often because it uses the natural properties of water and steam to ensure maximum hygiene and **cleanliness in respect of the environment.**

Dry steam
and
PowerJet

Athena 8 Plus

Its power features and compact dimensions make it an indispensable partner for all professional cleaning needs.

Thanks to its small dimensions, it can be handled and moved easily and it can be kept anywhere.

Athena is the solution you were looking for.

Some important features

- > High-performance 8 bar boiler
- > Unlimited steam autonomy
- > Built-in tanks
- > Power Jet
- > Dual-turbine motor
- > Molecular separator
- > Biggest water filter in its class
- > Intelligent electric absorption
- > Intuitive control panel with digital display
- > Shockproof and high-resistance plastics
- > High-load castors
- > Ergonomic handles

It washes and sanitizes with steam, dries, sucks up dust and liquids, purifies the air.

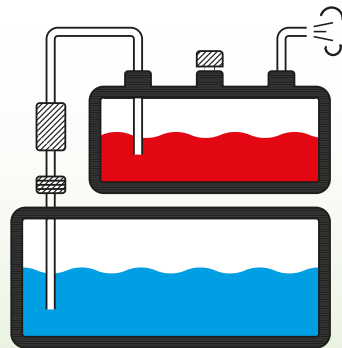

Double refill boiler

Athena 8 Plus
MADE IN ITALY

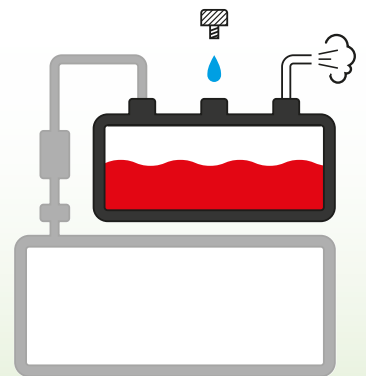

Athena's 175 ° C steam is a guarantee of deep hygiene thanks to its double refill boiler.

In automatic mode the Athena boiler refills itself, letting you work without annoying interruptions. If necessary, the double refill lets you to switch to manual mode.

**AUTOMATIC
MODE**

**MANUAL
MODE**

The Athena boiler, thanks to its special construction, can be cleaned with a simple step without the intervention of technical personnel.

Athena's 175 °C
steam is a
guarantee of
deep hygiene

Power Jet

enriched steam

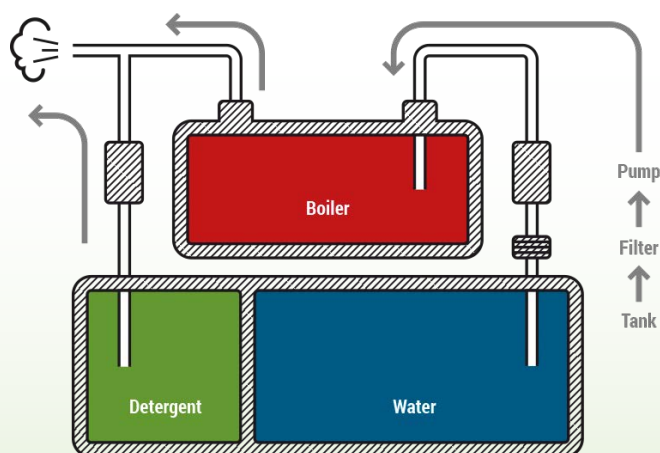

Athena 8 Plus
MADE IN ITALY

Athena's dry steam combined with the Power Jet function cleans even the most difficult surfaces.

This function allows increasing the steam power and the dirt removal. A special pressure pump injects water or detergent together with steam.

Some non-foaming detergent specific for high temperature can be used.

PLUS SYSTEM

Power Jet creates a high temperature mixture of steam and detergent useful for treating difficult to clean surfaces.

Power Jet speeds up dirt removal

Motor with separator

Athena 8 Plus
MADE IN ITALY

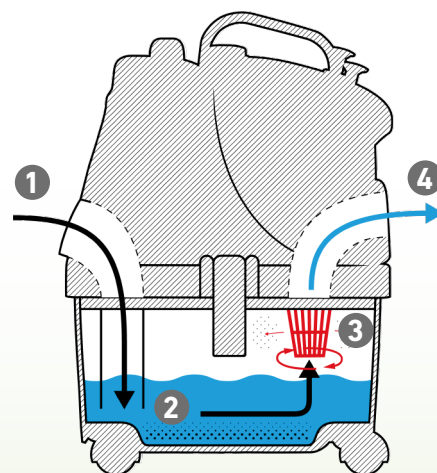

Athena's special motor performs two functions: deeply sucking the dirt and filtering the outgoing air.

The exclusive molecular separator mechanically intercepts the smallest dirt particles and guarantees constant air filtration.

Thanks to it, the engine will not suffer the loss of suction due to dirty filters that need to be replaced.

Athena's suction is always at maximum efficiency.

AIR CLEANING

- ① Suction
- ② Filtering through water
- ③ Filtering with separator
- ④ Output of clean air

Sucking up dirt is not enough, it must definitely be trapped
