# Ultra-fine Microfiber

The Maxima microfiber cloths are made of superfine microfibers with an asterisk-shaped structure. All the corners and slots increase the dirt collection surface considerably, making it incredibly absorbent and the dirt does not enter the fibre, so it can be easily washed. Maxima microfiber collects everything: dust, dirt, grease and bacteria; it's the perfect material to clean and sanitize thoroughly just using water.

## CLEAN, GREEN & HOME PROFESSIONAL

### MULTI-PURPOSE CLOTH

50x40 cm - ultra-fine microfiber

The universal cloth for dusting, cleaning, degreasing, drying and polishing all surfaces. Indispensable for quick and safe cleaning and total hygiene..

### GLASS CLOTH

41x39 cm - ultra-fine microfiber

The specific cloth for cleaning glasses, mirrors, crystals, chrome... ideal for polishing and finishing. It leaves no marks and no traces.

### MULTI-PURPOSE RAG

60x45 cm - ultra-fine microfiber

This rag has the same features as the Multi-Purpose Cloth. Thanks to its large size, it's useful for cleaning extensive surfaces and is excellent in the kitchen for drying dishes.

### MULTI-USE GLOVE

(ultra-fine microfiber)

This elastic-free glove has the same features as the Multi-Purpose Cloth. Thanks to its shape it allows to easily clean even the most difficult surfaces; it can also be used for personal hygiene.

### GREASE CLOTH

(special microfiber)

The essential cloth to dissolve and emulsify all types of grease: animal, vegetable or mineral. It is used wet without having to apply strong pressure when rubbing. Finish with Multi-Purpose Cloth.

### LIMESCALE CLOTH

(special microfiber)

This useful cloth avoids the formation of limescale on all surfaces in contact with water. When removing hard limestone that has already deposited we recommend using it with natural acids, i.e. vinegar.

### ORGANIC SOAP

Orange scent 100 gr

Natural soap made with organic olive oil and fine organic oils. Designed to clean clothes, isn't harmful to your hands and is also excellent for personal hygiene.

### THE ADVANTAGES OF THE MAXIMA MICROFIBER

- You save money because you no longer need to continuously buy expensive detergents.
- You save time because cleaning with microfibers is extremely fast and effective.
- You clean with less effort, and there's no need to rub vigorously.
- There are no harmful substances. Breathing when used is safe. Maxima does not use chemical detergents thus infections or allergies to the hands or the respiratory system are avoided.
- It's environmentally friendly. Using Maxima microfiber helps to improve the world in which we live.
