

P-410

Professional
vacuum steam
cleaning

MAXIMA
ADVANCED SOLUTIONS

P-410

P-410 is a professional steam cleaning machine for deep sanitation of all surfaces by way of its 4 available functions and 10 bar pressure.

with a high pressure dry steam jet that can be used alone or together with a detergent dispenser. This allows it to remove the most stubborn dirt while minimising the use of chemicals.

Furthermore, the steam can mix with water to rinse the surfaces and eliminate every residue.

The supplied vacuum cleaner can immediately dry surfaces by collecting solids and liquids inside a spacious steel drum.

Surfaces washed, dried and sanitised in an instant.

Power, autonomy and versatility

Its power and autonomy features are modular: easy to refill removable tanks, separable vacuum cleaner and extractable handlebar.

The water tank (10 lt) is extractable, so that it can easily be carried and filled without using further jerry cans or funnels.

The detergent tank (5 lt) is also easy to fill and buying an extra tank allows you to use different types of detergents without needing to wash it at every change.

Saves height space

The vacuum cleaner is housed on top of a sturdy stainless steel body which once disassembled, considerably reduces the height of P-410 allowing it to be easily transported even in normal vehicles.

The boiler refills automatically

P-410
MADE IN ITALY

P-410's 184°C steam guarantees deep hygiene thanks to its efficient boiler.

The boiler is one of the main components of the machine, inside of which steam is generated. Scaling is the boiler's greatest enemy. Maxima makes use of technologies designed to reduce the risks of obstruction and malfunctioning. The special construction of P-410's boiler allows it to be cleaned thus guaranteeing efficient use throughout the years.

STEAM GENERATION

1. Descaler injector
2. Stainless steel
3. Heater

Automatic refill

A high-pressure pump injects water directly into the boiler thus keeping its level constant while the steam is being used. The tank can be refilled even with the machine on without wasting time.

P-410's steam at 184°C guarantees deep hygiene

Steam enhanced with Twin Power Jet

P-410
MADE IN ITALY

The dry steam of P-410 together with the Twin Power Jet function thoroughly cleans even the most hard-to-wash surfaces.

This function increases the effectiveness of the steam and the removal of dirt. A special pressure pump injects detergent together with the steam outlet. A second pump injects water together with steam.

Two Power Jets in the same machine.

Technical data

Electric absorption : **15 A**
Suction: **2400 MM**
Motor power: **1200 - 1400 W**
Max size: **79,5 X 46 X 109 CM**
Min size: **74,5 X 46 X 58 CM**
Steam pressure: **1000 kPa**
Boiler power: **3500 W**
Boiler volume: **3,5 L**
Refill system: **AUTOMATIC**
Steam ready: **10 MIN**
Water tank for steam: **10 L**
Detergent tank: **5 L**
Dirty water tank: **15 L**
Power Jet enriched steam: **YES**
